
saslauthd errors?

Posted by Ds5v50 - 2008/03/06 15:20

I have followed the steps to a "T" only difference is I have used Centos 5.0/w updates. In the postfix logs I get the following errors.

```
#  
Mar 6 09:12:48 smtp postfix/smtpd: sql_select option missing  
Mar 6 09:12:48 smtp postfix/smtpd: auxpropfunc error no mechanism available
```

```
#  
I have done some searching but the results are pointing to cyrus-imapd. Any ideas from the users here?
```

TIA
