## Error experienced when using mail client

Posted by shawnbishop - 2006/10/12 07:03

---

Good Day

I am having a problem with the mail clients at my company. I have configured a mail Server using your above guide, The problem I am having is that when I try to send mail from Mail clients I get the following error

Protocol SMTP,Port 25:Secure (SSL): YEs Socket Error 10061 Error Number 0x800CCC0E

I know I am missing something very simple, what could it be??

Regards

Shawn

Hello :-(

So I guess nobody uses this forum anymore??,my question still hasnt been answered, and I ma sure there was a answer on the old forum before it went down??

:- :o

I appologize for the older forum posts being removed, and I am working on a way to have them get rolled in after vetting from the old site ...

It seems that you have a TLS issue with your postfix setup.

Are you trying to configure TLS?
